What's New in the?

What is WALTR? WALTR is a highly flexible yet easy to use tool that will help you manage your iOS devices wirelessly. If you are having a problem with sending files to a device via Wi-Fi, WALTR can help you. When you connect WALTR to your iOS device, it will automatically detect it and the content on your device. The transfer will happen instantly and in the easiest manner possible. To learn more about WALTR, see For support, please visit our support page: What's new in WALTR 2 After the success of WALTR 1, the developers have improved the app to make the operation even easier for people to connect their iOS devices to Wi-Fi. WALTR 2 will get faster when doing a transfer. It will now automatically detect your devices and content from the moment that WALTR is opened. If you have other devices connected to your Wi-Fi network, the transfer will not stop until all your devices are detected. You will now be able to save time by setting all your devices automatically. You can specify which content should be sent to which device. WALTR 2 will now automatically send your content based on the content that's being played on your devices, so you can pause your content without worrying about stopping your transfer. Which device do I need to send to which? The process of sending content to your devices may seem a bit complex, especially if you don't have many iOS devices. It may seem like an effort to set up a separate folder for every device. That's because most people have a hard time determining which type of content should be sent to what device, as well as the location of each folder. WALTR 2 does all the work for you. Your devices will be automatically detected by WALTR 2. They will be placed into the location you specified. You will also be able to specify which type of content (i.e. music, movies, photos, etc.) should be sent to which device and the location where it should be saved. Are you in a rush to send content to your devices? If so, you can skip the setup in just a few moments by doing the following: Click on the Select Content button on the main interface. WALTR 2 will identify your devices and automatically transfer your
